

# **Nokia N96 MobileTV Setup Instructions**

**(Australian Digital Testing Trial - Optus)**

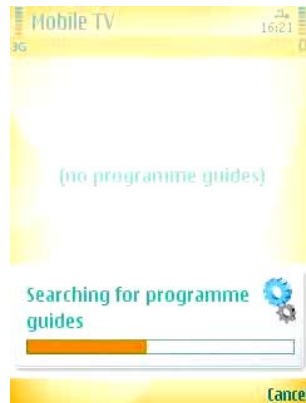

1. To start the Mobile TV Service press the **Multimedia** key on your N96 and you will be presented with the following screen.

2. Select **Live TV** and the phone will start to scan for a DVB-H service. This may take a little time, so please be patient.

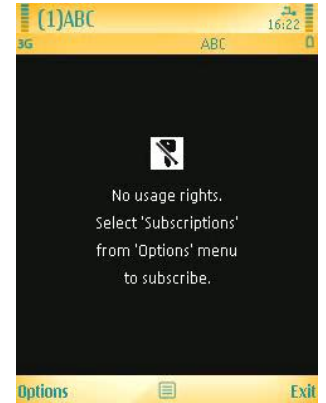

Once completed you will see one service available with the name **ADT Trial (OPTUS)**.

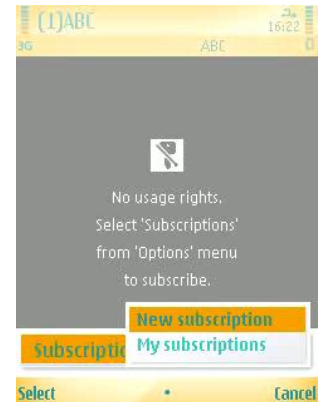

3. Select this service and then the program guide will be loaded, this again may take a little time.

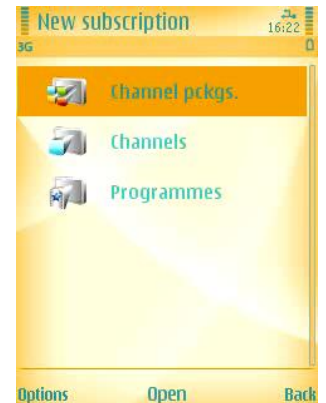

4. Once the guide is loaded, a black screen will appear stating you have no usage rights. Now you must subscribe to the service. As this is a demonstration there is no subscription charge.

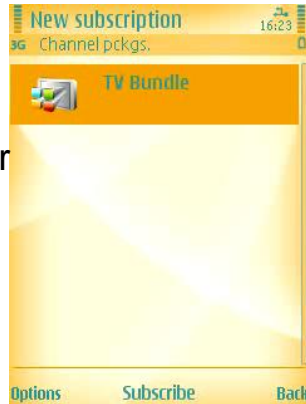

5. Select **Options** > **Subscriptions** > **New Subscription**

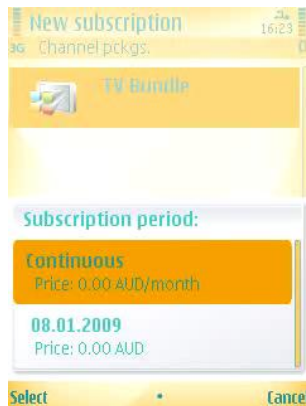

6. At the next screen select **Channel pckgs.**

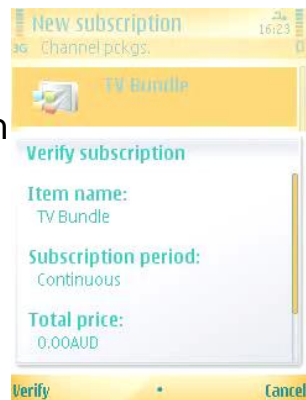

7. Select **TV Bundle**, a disclaimer window will appear, press ok. This has no relevance for this service

8. Choose **Continuous** for the Subscription period

9. Press **Verify** at the next screen

10. After verifying, you will be notified that the purchase request has been sent. This may take a little time, so please be patient.

**Note: you may receive a Certificate warning. There is no need to be concerned, just press accept, it has no effect on the service**

Next you will be notified that the usage right have been received.

11. Select the channel you wish to view, it will then load and Start. To have the image in Landscape mode press **Menu > Tools > Settings > General > Personalisation > Display > Auto Rotate** and select **On**. The screen image will now automatically adjust to either landscape or portrait with the movement of the phone.
